# New Line of Continuous Light by Profoto

## ProTungsten Air

ProTungsten Air is a continuous light source, which is dedicated to work with most existing line of Profoto's light shaping tools. ProTungsten Air units are available with 500 W or 1000 W lamps and equipped with state of the art cooling system, which is designed to minimize noises. In addition, the unit has built-in Profoto's renowned "Air" radio remote capability, which gives a user to activate or deactivate and dim 90% of the light at the palm of their hands.

The new ProTungsten Air is designed for heavy-duty use, its metal housing and all components are solid, reliable and can withstand even the most demanding shooting situations.

Both of 500 W and 1000 W can be used in ProTungsten Air. You can simply adjust the power of the light as simple as changing the bulb. ProTungsten Air is ideal for a photographers and videographers to meet their lighting needs.

By using Profoto's Studio software, a user can create and coordinate multiple lighting setups, which includes numerous units of flashes and continuous lights from the computers.

## Profoto Air inside

This symbol tells you when a unit has a built-in transceiver that makes it compatible with the Profoto Air system. It's your guarantee of a perfect remote control.

Technical data	ProTungsten Air
----------------	-----------------

Size	39 cm x 13 cm x 18 cm
Color	Black
Weight	2,7 kg (excl. cable)
Lamp Type	FEL (120 V), FEP (230 V) Tungsten
Lamp Life	300 hours
Wattage	500 W or 1000 W
Socket Type	G 9.5
Voltage	110 – 120 V 50/60 Hz, 200 V – 240 V 50/60 Hz
Color Temperature	3200 Kelvin
Fan Modes	2 modes

# Cine Reflector

The Cine Reflector combines film industry's popular Parabolic (PAR) reflector with the classic Profoto Zoom reflector that for long has been the most used Profoto light shaping tool.

The Profoto Zoom reflector is a textured "Open face type" reflector that provides a crisp, even light. The beam angle can be easily adjusted in the range of 35–105° without the need of lenses thanks to the unique Zoom functionality that has made Profoto the top choice among photographers.

Five types of lenses are to provide wider selection of light shaping that as well as scrims, color filters and barn doors give the extra edge that all photographers and gaffers were dreaming of. All accessories can be used in combination with both of the reflectors as well as with each other.

In addition, the Cine Reflector is equipped with double layer housing to protect users from burns and increase robustness. The housing also provides an umbrella attachment, which is commonly used by many photographers. An optional stirrup bracket is available for overhead mounting.
